1. (Previously Presented) A hybrid telecommunications switch comprising:
 - at least one circuit switch fabric;
 - at least one packet switch fabric; and
 - a controller configured to route IP traffic to the circuit switch fabric or packet switch fabric, depending on an ATM service category of the IP traffic.
 2. (Previously Presented) The switch of claim 1 wherein a portion of the circuit switch fabric resources are provisioned for circuit switched traffic and the remaining portion of the circuit switch fabric resources are allocated to IP traffic as the controller routes IP traffic to the circuit switch fabric.
 3. (Previously Presented) The switch of claim 2 wherein the controller is further configured to allocate circuit switch fabric resources to traffic falling within an ATM service category.
